
DIGITAL SOLUTIONS
TO ENHANCE PLANT PERFORMANCE

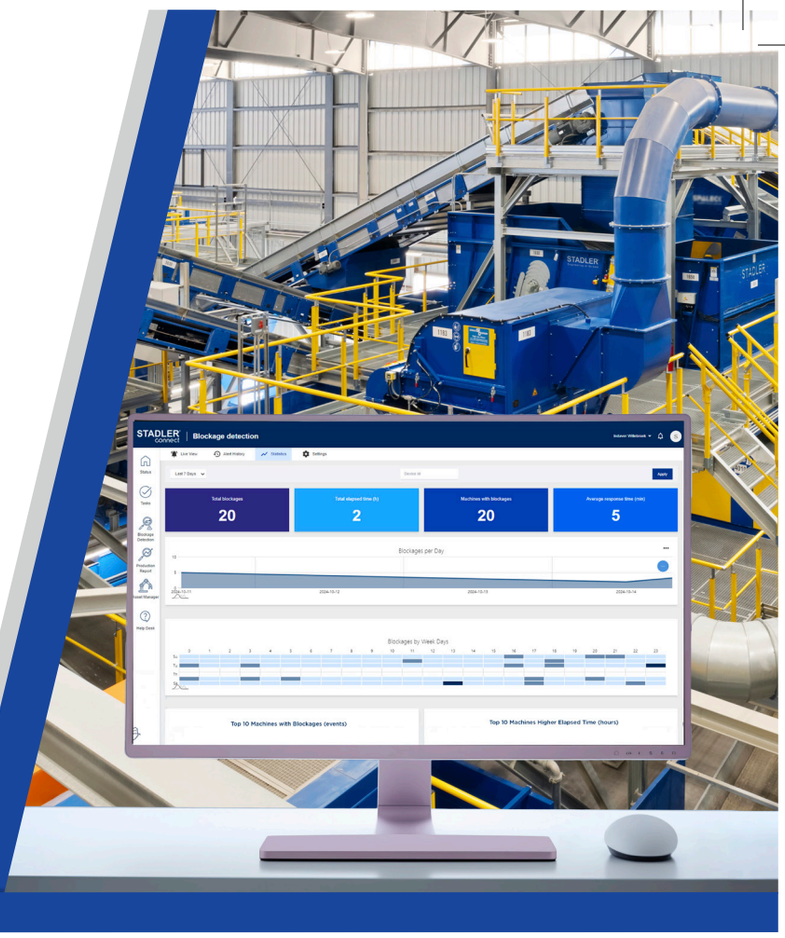
STADLERconnect leverages both machine data and material data to optimize the performance of your sorting plant. Powered by AI, our comprehensive platform focuses on two key areas, providing tailored solutions to boost operational efficiency.

Digital Maintenance:

- Blockage Detection
- Predictive Maintenance
- Downtime Tracker
- Support Portal

Automation & Material Analysis:

- Bale Analysis
- Production Report
- Material Split Control
- Windsifter Control



Key benefits of STADLERconnect for your plant:

Availability

Reducing downtimes with the help of the right data.

Plant performance

Reaching higher yields and throughput rates.

Qualities

Using sensor data to achieve required purities.
